| <b>Editorial Comment</b>  |          |
| The 23 Unsolved Problems in Hydrology<br>To all Hydrologists of the world: A Call to Arms!  | 1-6      |
| <b>Agbonaye, A.I. and Izinyon, O.C.</b>   |          |
| Precipitation Frequency Analysis of Three Cities in South-Western Nigeria   | 7-17     |
| <b>Olorunniwo, I., Aboyeji, O.S., Borisade, P.B., Soumah, M. and Oke, I.A.</b>  |          |
| Utilization of Geospatial Technology in Groundwater Potential Mapping in Obafemi Awolowo University, Ile-Ife, Nigeria   | 18-35    |
| <b>Chia, V.D. and C.C. Mbajiorgu</b>  |          |
| A Comparative Study of KINEROS2 and AGNPS Models in the Estimation of Runoff and Sediment Yield from an Agricultural Watershed                                | 36-49    |
| <b>Adejuwon, Joseph O.</b>  |          |
| The Spatio-temporal Variability of Rainfall over Sokoto-Rima River Basin  | 50-67    |
| <b>Ogwo V., Mbajiorgu C. C., Ogbu K. N. and Ndulue L.E.</b>   |          |
| Streamflow and Sediment Yield Prediction Using AnnAGNPS Model in Upper Ebonyi River Watershed, Enugu State, Nigeria   | 68-88    |
| <b>Alabi A.A, Makinde V, Akinboro F.G, Adeleke O.O, Adewale A.O, Ogungbe A.S. &amp; Oniyide B. J.</b>   |          |
| Hydro-geophysical Investigation of a Part of FUNAAB Campus Using Geo-Electrical Sounding Technique  | 89-101   |
| <b>Aremu, A.S., Salami, A.W., Ayanshola, O.A. and Dauda, K.A.</b>   |          |
| Evaluation of Crop Water Requirements of Maize in Nigeria Using FAO Penman-Monteith Model   | 102-108  |
| <b>Vangeryina, T. and Ocheri, M.I.</b>  |          |
| Vulnerability of Rural Households to Flooding in River Katsina-Ala in Benue State, Nigeria  | 109-115  |
| <b>Yusuf, A.K., G. H. Sambo, Y. Mohammed and S.C. Alkali</b>  |          |
| Hydro-geochemical Characterization of Shallow Groundwater Resources in a Basement Terrain Using Geochemistry and GIS Techniques in Mubi, Northeastern Nigeria | 116-132  |
| <b>Ugwu E.I., Mbajiorgu C.C. and Okechukwu M.E.</b>   |          |
| Performance Evaluation of Water Management Practices at Lower Anambra Irrigation Project, Omor, Southeast Nigeria   | 133-145  |
| <b>Fehintola E. O., Lukman S., Amoko J.S., Adekunbi E. A. and Oke I. A.</b>   |          |
| Modelling the Efficacy of Fenton Process in Wastewater Treatment  | 146-159  |
| <b>Lukman S., Asani M.A. and Oke I.A.</b>   |          |
| Estimated Relationship for Groundwater Recharge from Rainfall in Sokoto, Nigeria  | 160-172  |
| <b>Ahaneku I.E. and S.B. Ayotunde</b>   |          |
| Performance Evaluation of a Laboratory-scale Anaerobic Baffled Reactor in Treatment of Domestic Wastewater for Irrigation Re-Use                              | 173 -180 |
| <b>Usoh G.A., Udom I.J. and Ahuchaogu I. I.</b>   |          |
| Investigation of the Quality of Waste Dumpsite Leachate and Effects on Downstream Water Source  | 181 -195 |
| <b>Guidelines to Authors</b>  |          |
|   | 196 -197 |
